

IMMANUEL AKROFIE-BRUCE

Motivational Speaker | AI • STEM • Digital Technology • Education • Leadership

KEYNOTE

AI & The Future of Education

Preparing Students, Educators and Organizations for an AI-Powered World

DESCRIPTION

Artificial intelligence has moved from a distant idea to a daily reality in classrooms, workplaces and communities. This keynote cuts through the noise and gives audiences a clear, grounded understanding of what AI actually is, what it changes, and what remains uniquely human.

Drawing on a background in science, mathematics, engineering and digital technology, Immanuel breaks complex systems into plain language and practical steps. Audiences leave with a realistic picture of AI's strengths and limits, and a framework for using it responsibly.

The talk closes on opportunity: the skills, mindsets and habits that keep students, educators and organizations relevant in an AI-powered world.

IDEAL AUDIENCES

- K-12 schools and school boards
- Universities, colleges and faculty development days
- Education conferences and professional learning events
- Organizations rolling out AI tools to their teams

WHAT AUDIENCES TAKE AWAY

- A jargon-free mental model of how modern AI works and where it fails
- Responsible-use principles for classrooms, teams and institutions
- The human skills that gain value as automation expands
- A practical starting plan for AI literacy across an organization

AVAILABLE FORMATS

45-60 min keynote • 60-90 min keynote + Q&A • Half-day workshop version • Virtual presentation

“Your circumstances may influence your journey, but they do not have to define your destination.”
