Motivational Speaker | AI • STEM • Digital Technology • Education • Leadership

WORKSHOP

AI for Educators

Practical AI Skills for Teaching and Learning

DESCRIPTION

A hands-on session that takes educators from curiosity to competence. Participants work with AI tools directly, evaluate outputs critically, and build classroom-ready practices.

The workshop covers lesson planning, differentiation, feedback, assessment integrity and honest conversations with students about appropriate use.

IDEAL AUDIENCES

- Teachers and faculty at any comfort level
- Instructional coaches and curriculum leads
- Professional development and PD days
- School boards and district teams

WHAT AUDIENCES TAKE AWAY

- A personal toolkit of AI tasks that save real preparation time
- Prompting techniques suited to lesson and assessment design
- Academic-integrity approaches that work in practice
- A school-level AI-use guideline starting draft

AVAILABLE FORMATS

90 min interactive session • Half-day workshop • Full-day PD with follow-up • Virtual workshop

“Your circumstances may influence your journey, but they do not have to define your destination.”
